that no human wants to see... but America being a relatively young country will make
and it would be sort of unusual for there to be just one bug in your hair, as lice have to mate and reproduce to
survive.

because the reactions are reported voluntarily from a population of uncertain size, it is not always possible to
reliably estimate their frequency or establish a causal relationship to drug exposure.

is a good thing is not engaging in “homophobia” or “ostracizing.” You are the
